

Three Phase Track Recessed Dali 4000 mm

Designed by FLOS Architectural, 2014

Length: 4000 - Wall recessed, Ceiling recessed

GLOBAL TRACK offers benefits for advanced installations: the main connectors are feedable and the feeding cable can be hidden under the elegant suspension accessories. GLOBAL TRACK lighting tracks are designed for easy surface mounting on ceilings and walls, or recessed mounting in suspended ceilings. Lighting tracks can be suspended at any desired height. Other advantages of the three-circuit system are its high loading capacity and the possibility of forming independent fixture groups in all three circuits. This permits illumination of the most demanding environments.

Are you a professional and your project needs consulting and support?
